About me

Always searching for more passions to chase, I am an enthusiastic junior frontend developer based in Romania. Spent the last several months working on my skills, looking to optimize not just the project I am currently working on but the way I am thinking, designing requests and being creative.

Hobbies

Drawing portraits and painting

- Developed skills in creativity, attention to detail, patience, perseverance, problem-solving, and communication through my art hobby.

Projects

HUSTLE GYM

- Full responsive website created using: TypeScript, React and Tailwind CSS.
- Implemented Vite, tool which was used instead of create-react-app, in order to eliminate time spent on building
- Deployment made on Cloudflare, which is easier than Firebase and faster to work with.
- Implemented pages such as 'Contact Us' using FormSubmit. A form backend, API and email service for HTML forms.
- I've also designed and created my own graphics elements for my page to look aesthetically pleasing using Krita.

- SKILLS: TypeScript, React, Tailwind CSS, Vite, Framer Motion, Krita, Canva, Photoshop, Cloudflare.

CAT BREEDS

- Website that allows you to look for a cat breed and related informations
- Also I implemented and manipulated HTML and CSS classes in order to build a good looking platform.

- SKILLS: Javascript, React, CSS, HTML.

PORTFOLIO

- Full responsive web platform for my portfolio where I've worked with JavaScript, React and Tailwind CSS.
- Deployment made on Cloudflare. It contains a a short view of all of my projects.
- Both demo and code variants of all the projects that are accessible through a button.
- Implemented pages such as 'Contact Us' using FormSubmit. Also I used React Scroll component for animating vertical scrolling.

- SKILLS: Javascript, React, Tailwind CSS, Cloudflare, Getform.

MEALS-APP

- For this project I've created a web platform for food recipes where I've used JavaScript to implement functionalities that were needed. I've sent requests to web API and I've integrated their responses to my application.

- SKILLS: Javascript, React, CSS, HTML.

Califications

- The Complete JavaScript Course 2023: From Zero to Expert. (Udemy)

- React - The Complete Guide including: Hooks, React Router, Redux. (Udemy)
